The Company pursues a policy aimed at the continuous improvement of its performance, minimizing, where technically possible and economically sustainable, any negative impact of the product and environmental impact. Furthermore, with reference to the management systems processes, the Company always aims at the minimum acceptable risk. This general mission is pursued by aligning its actions with the principles of Management Systems that comply with the laws, product regulations and standards:

9001 - AND ENVIRONMENTAL OF LCA

With this scope, the Company, through the joint work of Management, Management Representative, Environmental Manager, Management System Manager and all the operators, intends to:

- ensure that the corporate policy is appropriate to the corporate mission, to the nature and extent of the risks relating to: production processes, management of environmental impacts;
- ensure that the policy is available to all interested parties and disseminated to all persons operating under the control of the organization including suppliers;
- provide adequate human resources, know-how, materials and techniques (machinery, equipment, technology and infrastructure) to improve the effectiveness and efficiency of the Management Systems;
- check the quality of the products supplied and the services of its suppliers;
- ensure the commitment to meet the applicable requirements and to continuously improve the performance of the supply and environmental processes (commitment to environmental protection and pollution prevention), in addition to respect for the environment connected to the activity (sites where it operates);
- ensure that the activities are carried out in compliance with the provisions of the law, current legislation, regulations and other requirements that may be signed regarding the product, production processes, the environment and the product life cycle;
- supply products and services that always meet the contractual requirements and, where possible, provide for the unexpressed needs and expectations of customers;
- make the entire organization responsible for product and support management processes and the environment. All this with the collaboration of everybody, according to the attributions and competences, from the employer/management up to all workers;
- consider the management processes of the activity, the prevention of pollution and the related results as an integral part of the organization;
- ensure periodic reviews of the Policy and of the implemented management systems;
- ensure that objectives and related implementation programs are defined and shared internally;
- promote, through adequate training and information, the awareness and involvement of all personnel who work in all management systems;
- exploit renewable resources and reduce energy consumption as much as possible.

This Policy applies to the activities, to the site located and is communicated in the appropriate forms to all the people somehow involved in the organization and is available and transmitted to all interested parties who request it.
